

CHECK IT OUT!

In order to make your rental experience a smooth one, we ask that you review our checklist to familiarize yourself with the conditions necessary for an inflatable rental. These points will also help us recommend the proper inflatable piece that will best meet your needs.

INFLATABLE CHECKLIST

- ☐ The area on which the inflatable will be placed is level and clear of debris.
- ☐ There are no overhanging trees or power lines.
- ☐ If it is a water piece, that a water spicket is within 75 ft of inflatable location.
- ☐ Proper 110V electrical outlets, with 20 amp circuit breaker, are within 75 ft of inflatable location.

IMPORTANT THINGS TO REMEMBER:

- A grassy area is preferred to avoid bruised knees and scraped elbows!
- In the hottest summer months, please do not place inflatables in direct sunlight.

ON THE DAY OF DELIVERY:

- The setup location & the path leading to the setup location should be cleared.
- Be prepared to provide electricity, or show our staff where outlets are located.
- Any underground irrigation or power lines need to be clearly flagged or marked.

SAFETY FIRST:

- Supervision by an adult is required at all times.
- **NO** food, gum, drinks, sharp objects or **silly string** are permitted inside ANY rental piece.
- Persons using the inflatable should fall within the recommended height, weight and age range associated with the rental piece.
- To avoid injury, entry and exit points should never become crowded and always be approached in a calm and orderly fashion.
